

ACCURACY FOR CURE

Global TeleRadiology is dedicated to providing diagnostic teleradiology interpretations with a mission of becoming the radiology industry game changer on accuracy of reporting

Evidence based diagnosis on the rise

Today, improved lifestyles and increased health awareness have led to longer lifespans.

At Global TeleRadiology we believe that technology should provide the key to improving **performance**. We are committed to our mission of becoming your go-to-partner for **accurate, time-sensitive, cost-effective** imaging reports and interpretations that focus on high quality patient care. Ensuring absolute **reliability** and **high quality** for all customers

World over senior population percentage is on the rise. Add to it sedentary lifestyle and rising incidences of non-communicable diseases like CVDs and arthritis, and you have a clear case for image-based diagnosis. It's hardly surprising then that more and more physicians are depending on imaging tests to accurately diagnose and prescribe the correct course of treatment.

Challenges in radiology

In a field where a quick and accurate radiology diagnosis can save a life, medical practitioners and healthcare facilities are facing similar challenges like delays due to inefficient workflow processes; poor report quality; high turnaround time; shortage of serving/new radiologists; their uneven geographic distribution; and the high costs associated with setting up a complete radiology infrastructure

THE RIGHT INTERPRETATION CAN MAKE ALL THE DIFFERENCE

UNDERSTANDING TELERADIOLOGY

Teleradiology is the practice of having medical images interpreted (read) by a radiologist who is not present at the site where the images were generated.

Boosts Up Efficiency of Output by Remodeled Process Flow

It is a cost-effective solution that supports your healthcare facility with experienced radiology coverage, reduced management overhead, and greater patient satisfaction with enhanced quality.

Help Redistribute the Workload

By helping you staff the second & third shift as well as provide weekends and vacation coverage. It also helps your existing radiologists enjoy a better work-life balance.

Provides Quick Access to Remote Areas

Ensures real time coverage to remote areas using the available technology to provide accurate and timely diagnosis through radiology interpretations.

Subspecialty and Vacancy Coverage for 100% Efficiency

Teleradiologists act as an extension of your team by providing subspecialty coverage expertise as well as cover for vacancies and surplus volume when there is a requirement.

WHY GLOBAL TELERADIOLOGY?

Quality Reporting

- Processes designed for zero errors following six sigma practices
- Proprietary CLIP™ quality
- Built on ACR (American College of Radiology) guidelines

- Free physician consultation
- Free Technician training and IT support

Operational Efficiency

- Reduced management overhead
- Monthly performance report
- Single point of contact for everything

World-Class Technology

- Market leading Meddiff PACS
- Highest end Apple Technology
- Remote order entry and report viewing
- Tablet and smartphone integration
- Secured data transmission
- DICOM compliant

Value Adds

- Secure patient portal for easy reference
- Quality endorsement via unique CLIP™ quality
- Voice notes- patients and physicians
- Mobile App

Renowned Radiologists

- Access to industry's best talent
- Subspecialty expertise
- In-depth modality experience
- 24X7 consultation

Faster Turnaround Time (TAT)

- Realtime consultation
- Round-the-clock availability
- Emergency protocols

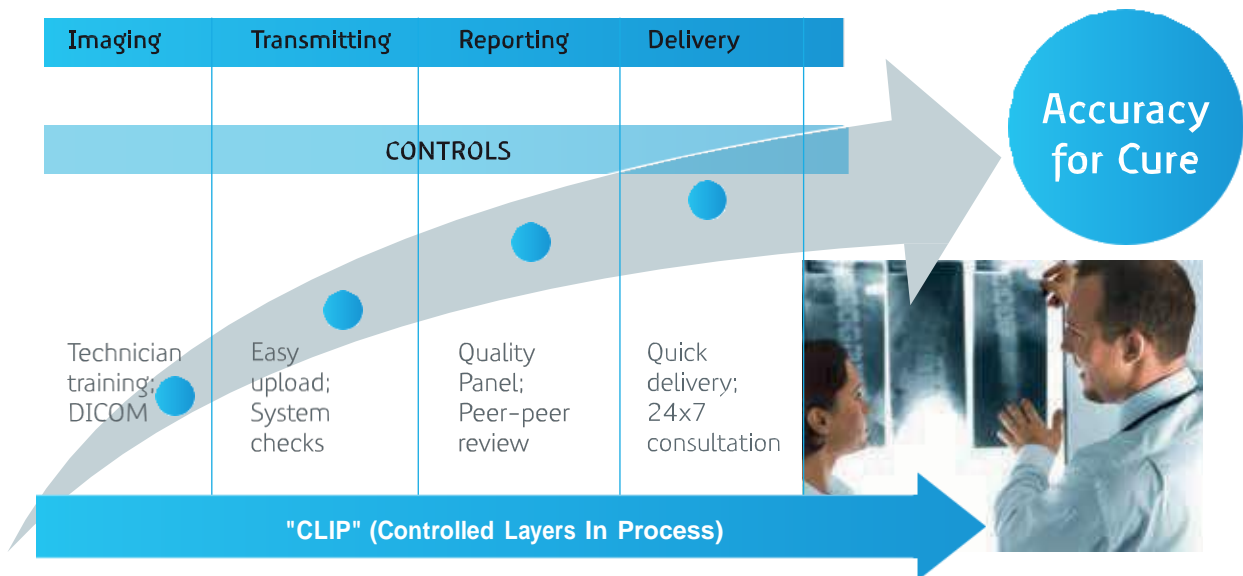

Cost Advantage

- Pay per use
- Customized to fit your needs

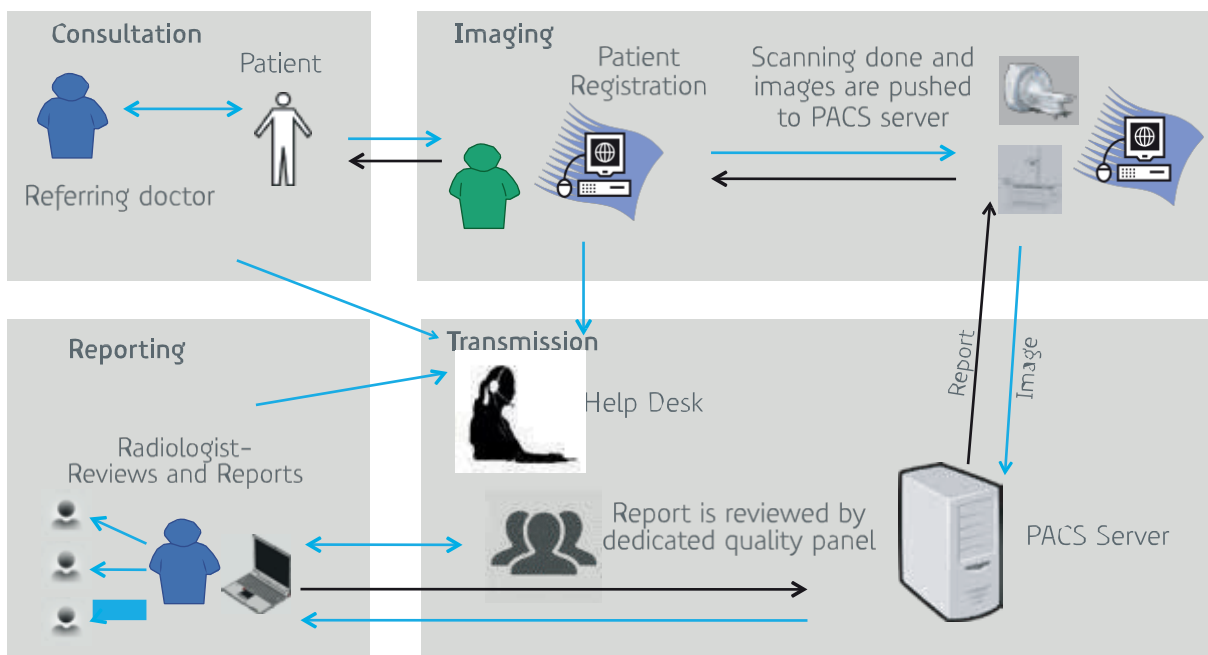

QUALITY DIAGNOSIS BEYOND BOUNDARIES

PROPRIETARY CLIP™ QUALITY

At Global TeleRadiology, we follow a unique and comprehensive methodology CLIP™ (**Controlled Layers In Process**) to ensure that our reports are of highest quality. Each step under this methodology contributes towards accurate & timely delivery of high quality reports.

WORKFLOW

We have a robust workflow to ensure there are no compromises when it comes to producing accurate and timely reports. It enables each individual to perform with optimum efficiency and allows checks and balances at each step to ensure quality delivery.

MODALITIES COVERED

- Magnetic Resonance Imaging (MRI)
- Computed Tomography (CT)
- Mammogram
- Ultrasound
- X-Ray
- PET-CT
- Nuclear Medicine

SERVICES OFFERED

Preliminary and Final Interpretations

We provide radiology interpretation through teleradiology to our clients, covering them for capacity issues, overflow, subspecialty, second opinions, quality audits and vacation coverage.

Throughout the year we are dedicated to meeting your needs and customise solutions accordingly. We also provide high-quality, accurate preliminary reads across the globe. Our complete teleradiology coverage provides staffing flexibility and saves money by converting fixed professional costs into variable costs and accurate reporting for best patient care.

We provide a variety of reports and reading options to meet your daytime coverage requirements including:

- **Routine Service:** Routine service offers customized turn-around time (TAT) as per client requirements and is available on all business days.
- **Emergency Service:** Emergency service is available 24x7 with a quick turn-around time.

Emergency Nighthawk

We provide night coverage flexibility to your Hospital or Imaging Center and help you mitigate the staffing challenges for off-hours diagnostic image interpretation.

For critical instances you can indicate the urgency and we will send an initial report followed by the final printable report.

We have a sophisticated web-based system to facilitate two-way communication of all results as well as a dedicated helpline to facilitate communication of critical or urgent results directly to the referring physician.

Subspecialty and Vacation Coverage

We have radiologists proficient in all radiological subspecialties to ensure accurate interpretations of most challenging cases.

We can provide subspecialty reports in the fields of Cardiology, Musculoskeletal disorders, Neuro-radiology, Vascular disorders, Oncology, Chest related disorders, Gastro-Intestinal disorders etc. We can provide a cover for planned/unplanned outages, whenever you want.

Audit Reporting

We also offer external Audit for your existing images and reporting quality. At Global Teleradiology, we have a robust 3-step audit approach that guarantees the identification of all significant variances thereby helping you improve the quality of patient care.

At Global TeleRadiology, we have a robust 3-step audit approach that guarantees the identification of all significant variances thereby helping you improve the quality of patient care as well as remain fully compliant with the statutory regulations.

Second Opinion

We provide expert opinion on clinically complex cases. A second opinion on diagnosis is often sought by physicians and patients in deciding the appropriate course of treatment.

BOARD OF ADVISORS

Our Board of Advisors comprises healthcare industry stalwarts from across the world. Alumni of some of the most prestigious healthcare facilities globally, known for their remarkable achievements, their expertise and opinion is highly sought after. Their association with Global TeleRadiology is an affirmation of our high standards of quality and world-class practices.

Al Gillis: Director, Healthcare Facilities Development, Harvard Medical International / Partners Healthcare, Boston, USA.

Al is an industry veteran and has been with Harvard Medical International/Partners Healthcare since last 16 years now. His expertise ranges from overall facilities planning (including medical equipment) to Organizational Development, HIS, Hospital Management, SOP's development & commission et al. His international experience spans over 20 countries in multiple continents. Prior to joining HMI/Partners Healthcare, Al was Director of Healthcare Facility Development at Adam & Associates in MA (USA), Senior Director Clinical & Diagnostic Services, Healthcare International in Scotland and Director Administration & Finance at Brigham & Women's Hospital, Harvard Medical School, Dept. of Radiology. Al was also the Vice President, Treasurer, HMS-PBBH-SFCC Radiology Foundation, Inc, USA.

Dr. Vijai Kumar: President and Chief Medical Officer of Excel Life Sciences, Inc., USA.

Dr. Kumar is a seasoned Healthcare Industry Management veteran with over 40 years experience in multiple facets of the industry. He is currently the President and Chief Medical Officer of Excel Life Sciences, Inc., a leading US based company providing trial management services & consulting services to global biopharmaceutical and device industries. Dr. Kumar's experience includes clinical research, business strategy, clinical trial logistics and supply chain management, regulatory affairs. He has also held senior executive positions at Sandoz and the Upjohn Company for 16 years. Dr. Kumar is a thought leader featured on NPR and BBC TV on issues related to globalization of clinical research. Pharma Voice recognized Dr. Kumar as one of the 100 inspiring leaders in the Life Sciences Industry in 2010.

Dr. D. S. Rana: Chairman, Board of Management, Sir Ganga Ram Hospital, New Delhi, India.

Dr. Rana is the Chairman of Board of Management in one of the most prestigious multi-specialty state of the art hospitals in India. Dr. Rana is known for his remarkable achievements in the field of Nephrology. Apart from his M.B.B.S, MD & MNAMS degrees, he also holds an international scholarship from Cleveland Clinic, Ohio, USA. Always going few extra miles above his professional responsibilities, Dr. Rana has made valuable contribution to the growth of Healthcare in India, and has also been conferred one of the highest state awards of India the "Padma Shree".

THE RADIOLOGISTS

At Global TeleRadiology, we have created systems & processes to deliver close to 6 Sigma Quality. Our highly accomplished, expert Quality panel ensures the quality of the reports by performing continuous audits and exploring new ways for further improvements in processes to achieve our avowed vision of being **the radiology industry game changer on accuracy of reporting**

Our Esteemed Panel:

**Dr. Ankur Gadodia, MBBS, MD (AIIMS), DNB, FRCR (UK),
Chief Radiologist & Quality Head**

Dr. Ambrish Raja, MD Radiodiagnosis

Dr. Ameeta Verma, MD Radiodiagnosis

Dr. Ankur Gadodia, MD Radiodiagnosis

Dr. Baljeet Kaur, MBBS, DMRD Radiodiagnosis

Dr. Charu Dutt, MD Radiodiagnosis

Dr. Disha Bansal, MD Radiodiagnosis

Dr. Gaurav S.P.Gupta, MBBS, MD Radiodiagnosis

Dr. Manish Jotengiya, MBBS, DMRD, DNB Radiodiagnosis

Dr. Manish V Rathod, MBBS, DMRD, DNB Radiodiagnosis

Dr. Pradip Pokharia, MBBS, DMRD Radiodiagnosis

Dr. Puneet Singh Kochar, MBBS, MD Radiodiagnosis

Dr. Reshma Dalvi, MD Radiodiagnosis

Dr. Sachin D. Balutkar, MD Radiodiagnosis

Dr. Satin Dutta, MD Radiodiagnosis

Dr. Sharad Jain, DMRD Radiodiagnosis

Dr. Sumeet Bhargava, DNB Radiodiagnosis, FRCR

Dr. Uttareshvar Dhumal, MD Radiodiagnosis

Dr. Vaibhav Mishra, DMRD Radiodiagnosis

Dr. Vidhyulatha, DNB Radiodiagnosis

Dr. Udaya Baskarini Vakamudi, DNB Radiodiagnosis

QUALITY PANEL

Dr. Ankur Gadodia, MBBS, MD (AIIMS), DNB, MNAMS, FRCR(UK)

Head of Quality. Dr. Gadodia is well-versed in Computed Tomography including helical and multi-detector CT, Magnetic Resonance Imaging (Craniospinal, Abdominal and Musculoskeletal), Digital Subtraction Angiography, Ultrasonography, Color Doppler Flow Imaging, Interventional Radiology, Ultrasound and CT guided FNAC and biopsies, Conventional Radiology including Barium studies, Intravenous Urography, Micturating cystourethrography, Hysterosalpingography, Sialography etc. He has won many awards and accolades including Dr Shyam Sharma Gold Medal for The Best Postgraduate and RSNA 2010 Introduction to Research for International Young Academics (IRIYA) award. He is a member of Radiological Society of North America (RSNA), Indian Radiological Imaging Association (IRIA) and National Academy of Medical Sciences (NAMS) and has published over 50 indexed publication and chapters in various books including API textbook of medicine.

THE MANAGEMENT TEAM

GlobalTeleRadiology's management Team comprises of industry experts from various fields, including healthcare management, operations, marketing, process development et al. The management team has five founder members.

1. Ritti Jares – Executive Director

Extensive experience with Fortune 500 companies for over 23 years around the world. An Operations expert has been responsible for multiple processes initiation, processes migration & development of new Operations Centers in multiple industry verticals. An expert in back-office management with latest technologies and large teams.

2. Vishal Chowdhary – Managing Director

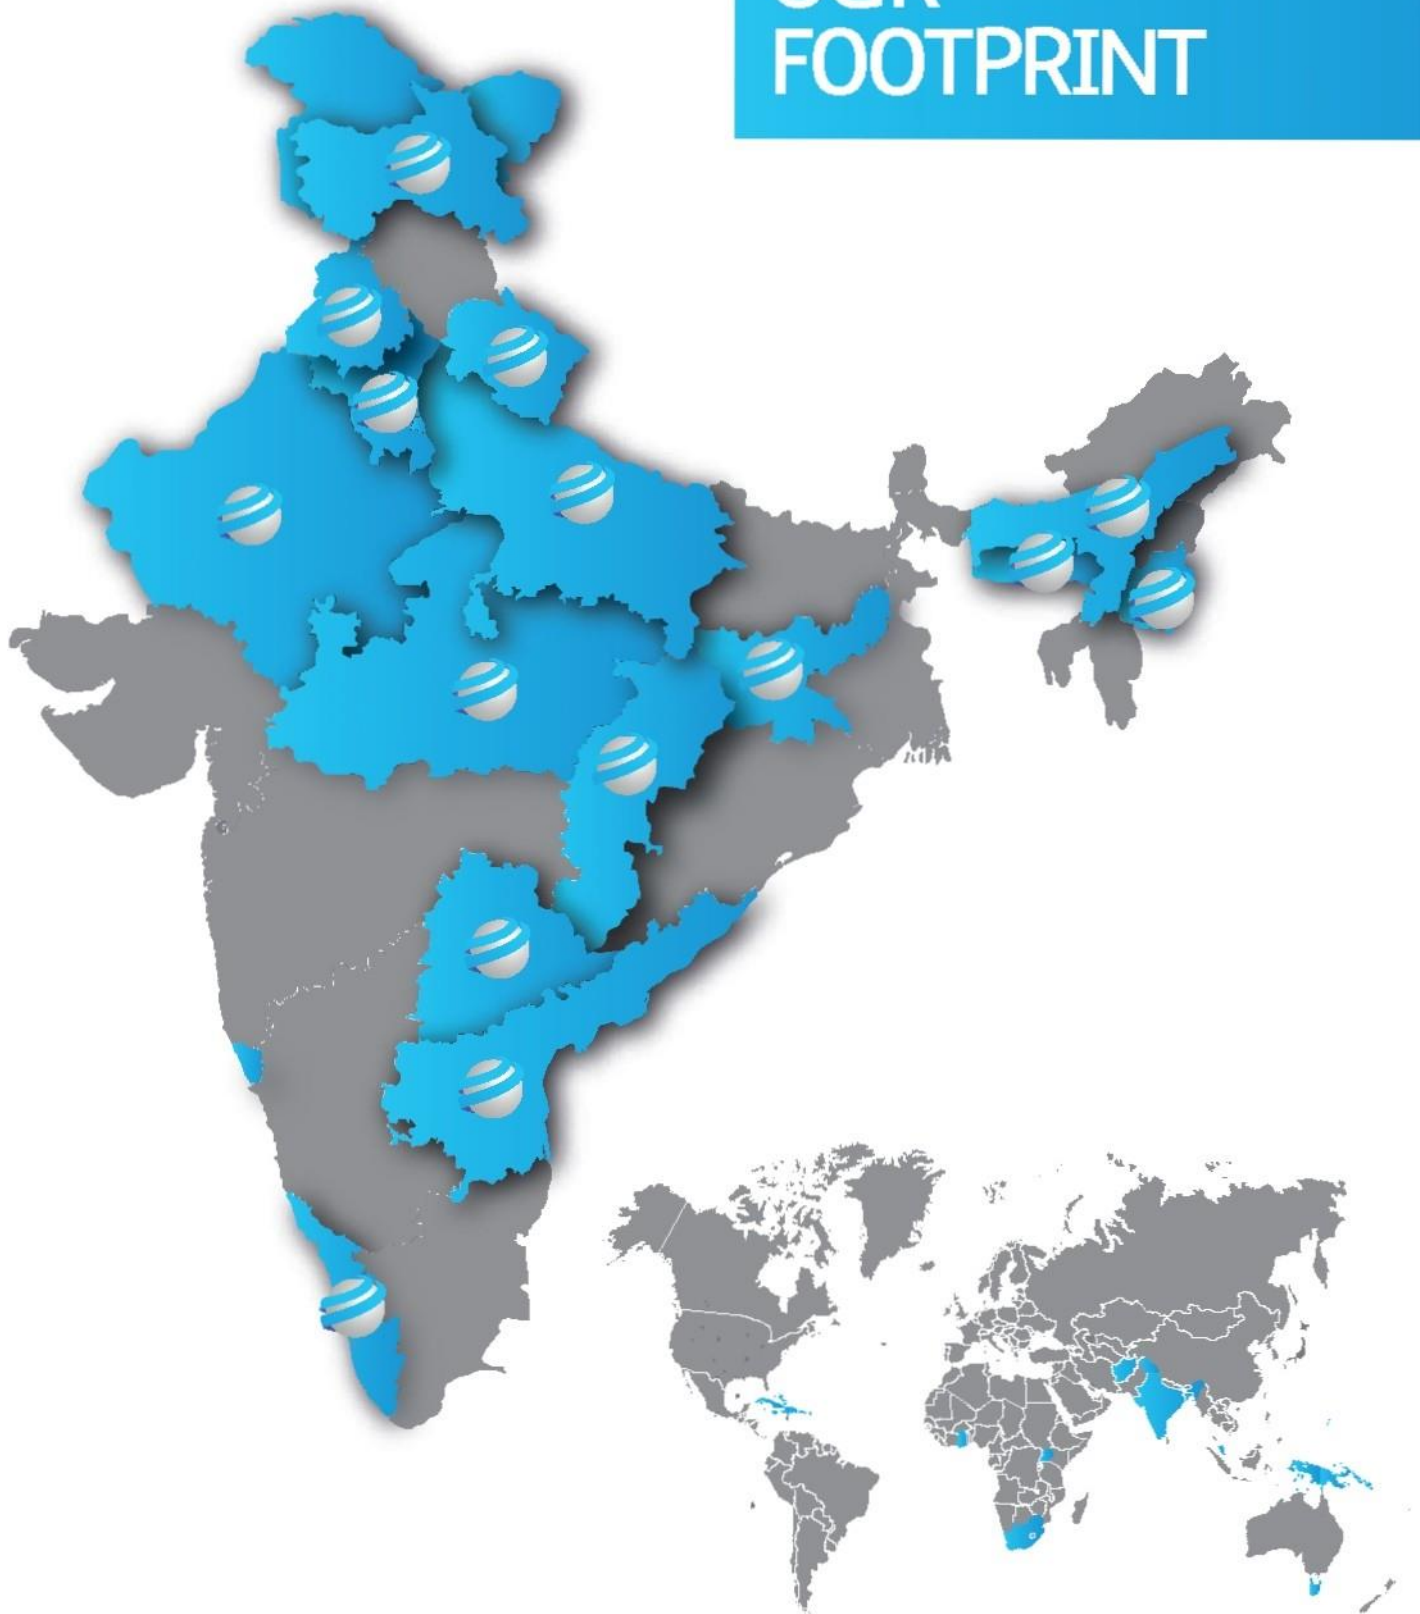

Over 25 years of experience in creating and building number of highly successful organizations & brands in multiple industry verticals. Extensively involved with the Healthcare Industry for past 15 years, in assisting healthcare delivery and pharmaceutical companies in creating their Long-term businesses. Was a founder member of the first multi-locational integrated healthcare chain in India.

3. Namita Chowdhary – Executive Director

Widespread experience of over 25 years in areas of strategic business management and marketing, product launches, brand positioning, research, field marketing, event management & public relations in some of the world's largest businesses in their verticals. Has been extensively involved in Healthcare businesses initiation and growth strategies in last 15 years.

OUR FOOTPRINT

1. Best in Industry TAT
2. High Quality Standards with 99.70% delivered Quality
3. Highly Satisfied Customers: Zero Churn
4. Sustainable reduction in client's overhead cost
